The Examiner has required restriction between claims 1-3, drawn to a warehouse safety device (classified in class 211, subclass 180), and claims 4 and 5, drawn to an offset bracket (classified in class 211, subclass 192). Restriction was required because the Examiner thought that the combination as claimed in 1-3 did not require the particulars of the subcombination as claimed 4-5 because the combination does not require a pair of arms. Also, the Examiner thought that the subcombination has separate utility such as use without a pallet rack.

The Commissioner may require restriction if two or more independent and distinct inventions are claimed in one application. In the present case, although the claimed subject matter may be classified in different classes, the inventions are not distinct because claim 4, like claims 1-3, requires that the offset bracket is attached to a pallet rack. Accordingly, claim 4 does not have separate utility such as use without a pallet rack.

In view of the above, it is respectfully requested that the restriction requirement as to claim 4 be withdrawn, and that claims 1-4 be examined.

Dated: December 13, 2004

Respectfully submitted,
